Infix to Postfix Converter

Hopefully you will know about the infix and postfix expression after the theory class. In the assignment you will do operations on infix and postfix expressions.

Input: An infix expression (I) will be given as input:

Output: You need to output the corresponding postfix expression (P) of the given infix expression (I).

Algorithm: Will be covered in the theory class.

Sample input and output:

Input: $(A+B)*((C-D)*E+F)$

Output: $AB+CD-E*F+*$

Section: A2 and B2

Submission Deadline: 12th June, 2010 (B2) and 15th June, 2010 (A2)
